

Non-Fiction Double Entry Journal Sample

Questions?	Response:
1. What's the Solar System made of? A star with other planets rotating around it.	I think it is amazing that only one star could be the center of a solar system.
2. What's the life cycle of a star? It has life cycles just like us, birth, growth, development, middle age, old age, and death.	Even though stars aren't alive, they do have life cycles like us.
3. What's it like to travel in space? It's like you're weightless and you are floating.	I would like to travel in space and be flying and floating. It must be awkward.
4. How do humans survive in space? They'll need to bring more than just clothes in space.	It would be scary if we don't prepare for the task ahead of us.
5. Is there other life in the universe? Who knows?	I would be amazed if there are aliens. I wouldn't know what to say.
6. Which planet is the oldest? I think it's Jupiter.	I would like to go on the oldest planet in our solar system because it could've been the first planet born.

Questions?	Response:
<p>1. What is it like to travel in space? Imagine floating as if you had no weight at all. This is what you would experience if you were in orbit on a space shuttle. In this investigation you'll learn what causes the experience of weightlessness and how it can make many every day activities unique.</p>	<p>I don't think I can imagine having no weight and I would be floating that is very hard to imagine for me at least the weightlessness of space well I can't think of it.</p>
<p>2. How do humans survive in space? What would you pack for a trip to another planet? You'd need more than just a change of clothing! What would you eat and drink? What would you breathe? What would you use for shelter? In this investigation you'll think about what humans need to survive and then explore some answers to these questions.</p>	<p>How could you live in space eating out of a tube well let me tell you something it would get old the first day and that is no lie. How can they eat and drink in space well let me tell you something I couldn't do it.</p>
<p>3. Is there other life in the universe? Have you watched a science fiction movie about aliens from outer space? How did the movie director . . .</p>	<p>Yes, I have watched a science fiction movie about aliens well I had seen a lot of alien movies it looked like a weird thing you would see in the ocean that's what I think.</p>
