

MICROBES are Everywhere!

You can't see them, but they can kill you,
Make you sick, and make you stink.
So, wash yourself, with soap and water!
Don't share germs! Watch what you drink!

There are also many other
Little microbe heroes true!
And without them, we'd be sorry,
Sick, and hungry, me and you!

The producers make their own food.
The consumers? They do not.
Decomposers put back nutrients
As they make things decay and rot.

Yes, our world is so much better,
Thanks to unseen friends out there.
Just watch out, for all the bad ones,
'Cuz microbes are everywhere!

Words: Denise DeMille
Tune: Oh My Darling, Clementine
